

PRACTISE LIKE IT'S THE REAL TEST.

Selection tests for careers in the EU institutions are demanding, and the candidates who succeed are usually those who have practised under realistic conditions. This workbook gives you exactly that: **413 original questions** in the formats used in EPSO-style computer-based tests, each with a **full worked solution** that shows not only the right answer but why every other option is wrong.

- ✓ **Verbal reasoning** — 125 passages, with common traps named and explained
- ✓ **Numerical reasoning** — 105 table and chart questions with step-by-step calculations
- ✓ **Abstract reasoning** — 105 figure series with every rule spelled out
- ✓ **Situational judgement, accuracy & precision** and **prioritising & organising** sets for assistant-level procedures
- ✓ **3 timed mock exams** (40 reasoning questions each), score guides, answer sheets, a score tracker and an error log
- ✓ **Strategy chapters** with clear methods, 4- and 8-week study plans and test-day tactics

Who is it for? Candidates for administrator (AD), assistant (AST), AST-SC, contract-agent (CAST) and specialist selection procedures, and anyone preparing for European-style reasoning tests. The core reasoning skills stay the same even when test formats change, so always check your Notice of Competition.
